A monthly Investment outlook

FUTURE FOCUS

Saugata Banerjee

saugatab@mydigitian.com

“..It is a great opportunity to get access to the long term Investors' investment book with a research capsule, buy/sell real time guidance, and get a return of 20%-60% in 3-9 months - this is the unique offer Surrogate Investor brings ”

Why I love 'Surrogate Investor' product

DIGITIAN VIEW!

There is Q&A carried by Digitian Team on the philosophy behind Surrogate Investment :

Q. Why named as "Surrogate Investor"?

SB : Surrogacy is popularly used in pregnancy when a mother cannot conceive in a natural way then the couple can resort to a surrogate mother who bears the baby for 9 months and then gives birth to a child for that couple. There is a significant need of the same in the capital market where many people cannot get the return they are looking for due to skill gap, absence of time from their main occupation, gut feeling investment etc.

OUR USA RETURN in 2020 (30th November 2020): 19% vs S&P 500 YTD 5% (2019 32% vs S&P 500 28%)

In order to provide a solution, we work for them as **Surrogate Investment Advisor**, we invest in many shares, our team is 24*7*365 in the stock markets and we generate significant return on our own investment as well as for our private Investors for whom we manage investment funds over longer period of Time 3-7 years, we share our own invested share as a Tip to “Surrogate Investor” member **when we are sure the stock will go up 15-30% in a short span of 3 -9 months**, thus our member becomes Surrogate Investor and **gets an yearly return of 20-60%** depending upon market conditions. That’s why I kept the name of product as “**Surrogate Investor**”.

Q. What is the uniqueness of the product when so many free Tips in the market?

SB : Yes, you are absolutely bang on, there are thousands of tips in the market free and **that is the problem**, your funds are limited and so is your time, basically you are blindly investing on any of such tips without much analysis and as a result

MARKET WATCH

Equity Indices	Monthly Open	Monthly Close	Monthly Change %	2020 YTD %	2019 %
S & P	3348	3269	-2.4%	1.2%	28.9%
Nasdaq	11075	10911	-1.5%	21.6%	35.2%
FTSE 100	5902	5577	-5.5%	-26.1%	12.1%
Shanghai Composite	3218	3227	0.3%	5.8%	22.3%
NIFTY	11417	11621	1.8%	-4.6%	12.2%
Nairobi SE 20	1852	1783	-3.7%	-32.8%	-6.3%
Egypt SE 30	11051	10458	-5.4%	-25.1%	7.1%
Tanzania All Shares	1825	1782	-2.4%	-13.5%	0.9%
Nigeria SE 30	1148	1319	14.9%	12.0%	-16.9%
Morocco All Shares	10012	10460	4.5%	-14.1%	7.1%
Bangladesh DSE 30	1710	1704	-0.4%	13.4%	-20.1%

Commodity	Monthly Open	Monthly Close	Monthly Change %	2020 %	2019 %
Gold	1819	1883	3.5%	23.9%	18.5%
Crude Oil	39.13	36.59	-6.5%	-44.6%	22.0%
WTI Oil	37	34.37	-7.1%	-43.8%	33.6%
Copper	2.98	3.05	2.3%	9.0%	6.3%
Iron Ore	121.4	120.19	-1.0%	31.3%	32.4%
Aluminium	1760	1845	4.8%	2.3%	-20.1%

it is not working. **For the first time, you are getting a digital portal where you can go into and get a single selected tip on a share depending upon your investment profile where the advisor himself has invested. You will get a Tip where there is a 90% of chance of Success in the short term and 100% of chance in the Long term.** You can read all the research reports about the stock, the financial analysis, insider trading, option trading view and continuously getting market update, Quarterly performance Analysis, step by step buy recommendation and step by step sell recommendation for that particular stock. **Amazingly, this is FREE till you are making money on the Tip. We are member with approx. 15 world class assets managers/analysts firm in USA and India (two most vibrant stock markets)** we have not seen such service and benefit. That's why we can vouch **THIS IS UNIQUE.**

Q : What is behind the claim that there is significant return for Surrogate Investor ?

SB : As I have mentioned we are long term investors in our selected shares which we have selected by our own proprietary methods of detecting **Diamond Shares through WINGS.** These shares provide multiple time returns over a period of 3-7 years. So what you require patience and huge commitment in those shares. As a rule most of these **DIAMOND shares do not grow 200% at a time, it grows 30% to 60% in short span and then it corrects 10%-30% before again it grows 30% -60% after a period of 3-12 months** due to some good performance, future performance outlook or bullish Industry outlook. Since we are long term investors, when it corrects 20%-30% we do not sell the shares as we believe it will come back. We observe the share for its return signal , when we see that the sentiment for the share will be Bullish (obviously this is ahead of the market) then we suggest the share to our Surrogate Investor member, and they make 20%-60% return depending on timing. We have seen 90% of the time we are successful in the short term but since these shares are Diamond shares in the long term they are all successful and provides significant return. This is the simplistic explanation I can provide but behind each tip there are application of psychology of Investment and technical aspects.

Q: Why you like ‘Surrogate Investor’ product?

SB: We have mentioned in detail in Surrogate Brief Synopsis a must read before becoming a surrogate Investors. Please read our caption **“Let’s Make Money”** – I honestly believe that is possible for mid value investors.

- You are completely free to become a member and if you do not get value you can stop using the service:

- **Our Skin in the game** since we are invested in the share, we do not want to lose our money and our interest to see you make money so that we get our share;

- **UNIQUE INFORMATION MINES:** It is exceedingly difficult to get proper research report in the market but in Surrogate Investor - you will not only be getting proprietary research on the stock, plus various analysts report, quarterly performance evaluation, market reports on the Industry. I like this capsule format someone is doing the work for you.

- **MACTHLESS GUIDANCE :** Buy Tip does not end only with the first recommendation and target price and stop loss situation, the team is watching the stock daily and providing you continuously feedback because the market is dynamic so view on the stock is continuously changing, when to exit is the crucial decision and how to exit. *(Truncated)*

When we started our journey in the capital markets, **we did not have opportunity to get insights about the Guru Investors** (Warren Buffet, Rakesh Jhunjhunwala etc) are investing real time. **Think of the opportunity to exactly know how they are deciding on a particular stock and why they see value in the stock.**

I love “Surrogate Investor” because for the shorter time (say 9 months) investor is coming to know the Diamond stock which has the chance of becoming multi bagger

Be a millionaire Start Surrogate Investment ?

World First digital surrogate investor platform is now ready and for the first 6 months registration is **FREE**

Surrogate Investment refers to getting the benefits of Investment in stock like a professional without the pain of tracking the stock, studying the market trend and the time it takes to do the same. **REAL TIME**

Why it is a success:

- **Skin in the game:** the fund managers picked up these shares and invested in themselves basis proprietary Research
- **Time to market :** They are keeping daily watch on the stock/market behaviour and that of the global trend
- **Regular Profit booking :** They make profit and you make too in the short run

- **Professional Expertise & Performance Track:** Fund managers are super Qualified Professional Experts with their Return CAGR varies between 35%- 48% over last 10 years

What you have to do ?

- Have your trading account for full control of your money
- Act fast when Buy and Sell advice is given and make Huge Profit
- Only pay Back if you made money

Success returns :

Surrogate Investors are making 100%+ to 450% annualised return from each trade

New Service : Surrogate Investment

Digitian Capital (DC) has launched a new service "Surrogate Investment". We have come across many of our readers who may not have USD 100,000 or equivalent to join the club and make their investment fortune. Further, we understand **TRUST & BELIEF** are two big factors confronting the medium value investors. The service is designed to address these issues while creating a family of DIGITIAN investors :

The features of Surrogate Investment (SI) :

1. Invest your own Money through your own custodian account (so no money transfer)
2. Only two markets : India and USA
3. Atleast investable funds of USD 20,000 or AED 10,000 or INR 10,00,000
4. Digitian Capital would give you names of only 1(one) share (on the basis of our model **WINGS to freedom**)
5. You will invest yourself on the basis of that Tips on that share
6. Digitian will advice you to sell the shares at right point in time.
7. You transfer 20% of the profit you generated out of the sale of shares. (Say you invested USD 20000/- in Apple and you sold it at USD 24000 then you will pay DC, USD

800 (20% of gain of USD 4000)
8. On receipt of USD 800 DC will provide you another name of shares where you will invest again USD 20000 or more.

If you have a loss from a tip it will be adjusted first from subsequent gain, before upside kicks in.

So it is SIMPLE .. SIMPLE

Why You should avail this service?

- You do not have time like Professional Fund Managers like us, so you are getting a professional specific advise
- Your money is in your own account. You can sell whenever you want
- Digitian capital is doing all the hard work, Selecting the share, monitoring the performance of the company, attending AGM and Investors Conference, advising you the buy and sell time with entry and exit price.

Fees for the Service :

- a) ZERO UPFRONT Fees
- b) Upside of 20% of the profit **only on realisation** of the profit (So Zero risk)

Process :

- 1) Sign up : digitiancapital.com
- 2) Start Your millionaire Journey

BEST CHART OF THE MONTH

Chart. Current and Future General Activity Indexes

January 2008 to November 2020

Note: The diffusion index is computed as the percentage of respondents indicating an increase minus the percentage indicating a decrease; the data are seasonally adjusted.

Source: Philadelphia Fed

The diffusion index for current activity decreased 6 points to 26.3 in November, its sixth consecutive positive reading after reaching long-term lows in April and May (see Chart). The index for new orders decreased 5 points to a reading of 37.9. Nearly 49 percent of the firms reported increases in new orders this month, compared with 55 percent last month. The current shipments index fell 22 points to 24.9 in November. Nearly 41 percent of the firms reported higher shipments, compared with 57 percent last month.

Thus, Diffusion Index shows continued recovery

VALUE INVESTING

Debashish Neogi
debashishn@mydigitian.com

“ Given the growth prospect in the emerging markets and the relatively cheaper valuation of EM stocks vs US stocks are attractive”

Have You missed the rally - so what next ?

A year which is just few weeks away – we want to see this year end and some may want to forget. **BUT** from an investor perspective some may have made their greatest return of life and some may have booked their greatest losses in life – it all depends how you have acted in last 2 quarters !

Few days back I came through an interesting chart (Psychology of a market cycle) – “the feeling appearing as the market fluctuates” .

What may be going through your mind is have you missed the rally ? Please read what Mogan Housel had to say regarding this in his recent article .

..... “ It’s easy to ignore the power tail events because it’s painful to accept that most of what happens isn’t that important. Over the last 20 years, 9/11, Lehman Brothers’ collapse, and Covid-19 were pretty much the only economic headlines that moved the needle.

will likely provide all of your lifetime returns, and how you behaved in March 2020 was probably more important than what you did in the previous 100 months combined. Not a fun thing to accept, even if it’s reality.....”

Now, lets see the context which is beautifully articulated by Jurrien Timmer who is the director of global macro in Fidelity's Global Asset :

Assume, like many, you are in disbelief how can the market rise when Covid vaccine is still not rolled out or the real economy is not doing well. Please remember market is forward looking and hence market discounts the future which has exactly happened now.

Think of all the attention that went to everything else and ended up not making much difference; it’s depressing. Same with investing: make 50 investments and 10 or fewer – maybe only one or two –

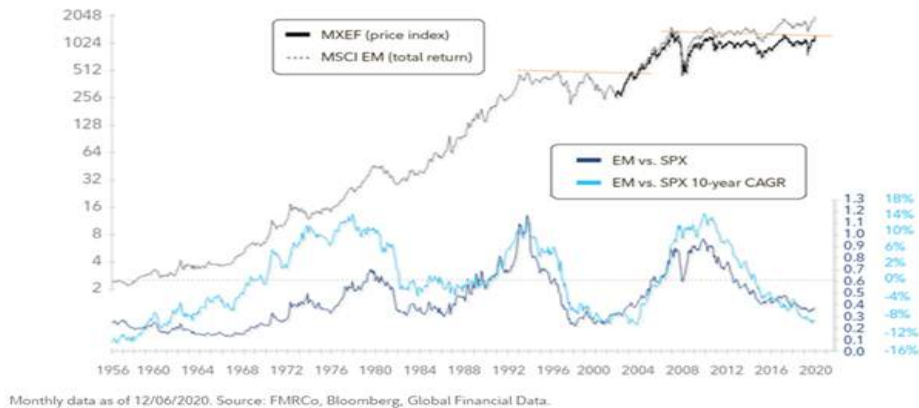

- After a decade of trading relatively sideways while the US stock market went up, emerging markets (EM) stocks seem finally poised to outperform in 2021 and beyond.
- A weaker dollar is key to this trend. The dollar has been declining since March as a result of all the liquidity provided by US policy makers and the Fed, and I expect this trend to continue next year and beyond.
- Earnings growth is another essential component of the bullish EM story. Indeed, with the promise of vaccines, global earnings are primed to recover further in 2021.
- With EM stocks trading at their lowest relative valuation to the US in almost 20 years,

- EM stocks could be one way to diversify the stock segment of your portfolio without having to pay sky-high valuations.

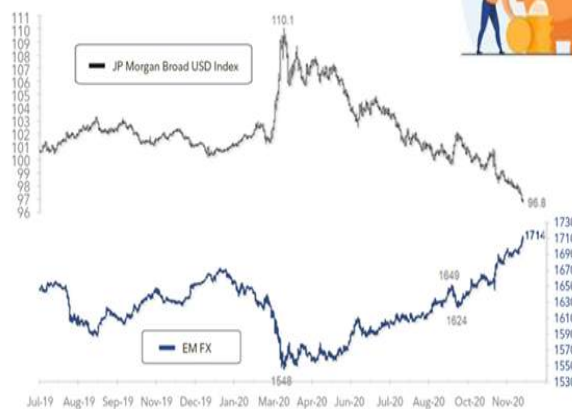

Amongst the emerging markets, Brazil is not in great shape and China has issues which have made it almost pariah and untouchable in the China +1 strategy (see below) .

Whats the reality now –To me China is a big power now, hence cannot be fully ignored. Having said that almost the the entire world who depends on China on supplies is looking at an alertanative to China. In this China+1 strategy, I feel India will play a big role . If we were to believe in data we are already seeing the shift .

Emerging markets

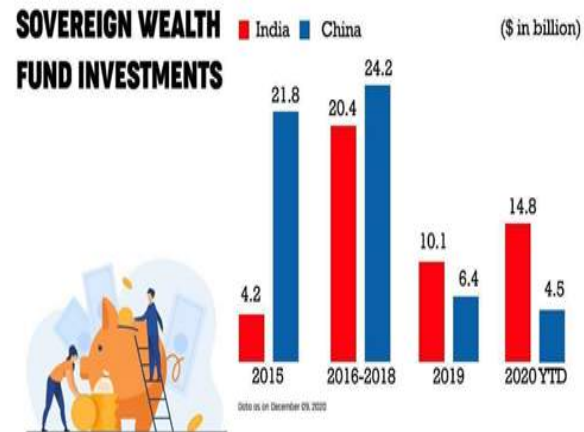

Currencies: US dollar vs. EM

Just to elaborate on above point of liquidity - the reason is easy to understand; if you are a managing American pension fund, you need to gun out at least 6% to keep your stakeholders happy. If the US 10-year bond yield is at 0%, how will you get to 6% without investing heavily in emerging markets?

SOVEREIGN WEALTH FUND INVESTMENTS

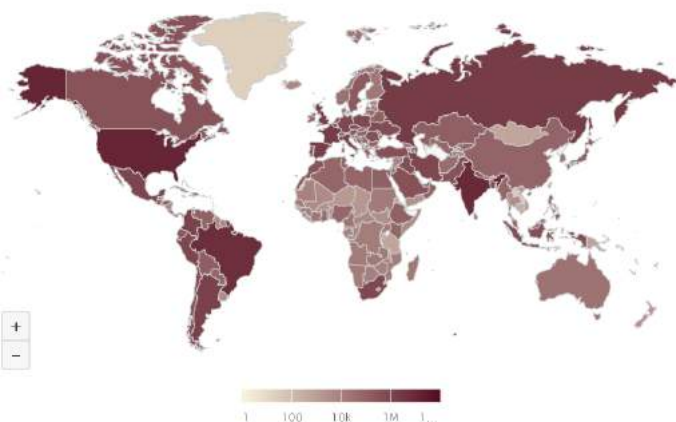

Sovereign Flow funds more flowed in India than China which could be a major shift and will fuel the growth in Indian market. So keep investing and ride the wave.
